Improved quality and efficiency of research facilities as assessed by research productivity, competitive research grants and contracts volume/ aggregate funding level, patents and licensure activity, academic achievement for graduate and undergraduate students, the science and mathematics competency of participating K-12 teachers, the acquisition and use of inquiry-based K-12 instructional resources, and the corresponding performance of K-12 students, and contributions to science and technology small (incubator) business development.	% of completion	40%	45%	40%	45%	45%		45%		45%	
4. Provide opportunities for greater interdisciplinary collaborations by establishing a single facility to house multi-disciplinary research centers; thereby, enabling the linkage of basic and applied research and development activities; the production and promotion of significant technological innovations; as well as the rapid transfer of resulting products into science, mathematics, technology and engineering teaching and learning programs-- in particular, programs that document learning gains among participating K-12 students.	% of Completion	25%	25%	25%	30%	30%		30%		30%
